

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR
CALENDAR DISSEMINATION IN A SUPPLY CHAIN MANAGEMENT
FRAMEWORK**

5

ABSTRACT

A system, method and computer program product are disclosed for disseminating
calendar information in a supply chain utilizing a network. A network is utilized to
10 receive data from a plurality of outlets of a supply chain relating to the sale of products
by the outlets. A calendar of events is generated. Access to the calendar of events is
allowed utilizing a network-based interface.
